

Offering complete flexibility and control over your online channel

eJeeva Commerce is a highly scalable eCommerce solution that automates and personalizes the online buying experience to increase sales. Its flexible architecture enables you to easily sell more products, attract new customers and automate your order management process.

Manufacturers and distributors running eJeeva Commerce have seen immediate improvements in their customer's shopping experience – leading to increased customer loyalty, sales, repeat business and referrals.

With complete integration to eJeeva's product information management (PIM) system – eJeeva Central – product updates, pricing and inventory are all updated in real-time.

Advanced features help your customers quickly find desired products, learn about new offerings, comparison shop, request quotes, process discounts and easily complete purchases.
